## EDUCATION

### Computer science

National University «Yuri Kondratyuk Poltava Polytechnic»  
(2022 – 2026, fourth-year student)

### Certificate "Professional Rust Developer"

Certificate for completing the bootcamp from Ukrainian Rust Community and successfully passing the Foundational Specialization test  
(2025)

### Certificate "Professional Rust Developer"

Certificate for completing the bootcamp from Ukrainian Rust Community and successfully passing the Backend Specialization test.  
(2025)

## ABOUT ME

I am an organized and confident developer with a great love for programming, a thirst for new knowledge, and a desire to improve my skills. While writing projects and completing a bootcamp in the Rust programming language, I was able to gain a good knowledge of developing secure and fast APIs.

I am self-disciplined and respect deadlines. I am honest, polite, and always ready to communicate with my colleagues.

## EXPERIENCE

- Over two years of programming experience in various languages (C++, C#, Python, JavaScript, Rust);
- Development of window programs (C#) and CLI applications (Rust);
- Development of chatbots (C#, Rust);
- Game development in accordance with SOLID principles using C# (Unity);
- API development;
- Team development using GitHub and GitLab.

## LIST OF TECHNOLOGIES

- Knowledge of the Rust programming language:
  - skilful use of the ecosystem;
  - different design patterns;
  - HTTP/HTTPS (actix-web, axum);
  - WebSocket (actix-ws);
  - REST API, gRPC;
- Knowledge of the C# programming language:
  - Unity game engine;
  - different design patterns;
  - using the R3 library for reactive programming;
- Git, GitHub, GitLab;
- PostgreSQL, MySQL;
- OAuth 2.0, JWT;
- Docker;
- Linux;

## LIST OF PROJECTS

- **co-write** – a website for collaborative text editing in real time.
  - link: <https://github.com/FantRS/co-write>
- **screen reader** – is a small command-line utility for Linux written in Rust that lets you capture a selected area of the screen, extract text from the image using OCR and copy the recognized text to the system clipboard.
  - link: <https://github.com/FantRS/screen-reader>
- **The Question Game** – a mobile quiz in which the user selects a category of questions and answers them. The game has a simple structure: selection of a topic, sequence of questions. The main goal is to play with friends in order to get to know each other better. The game has more than 10 categories of questions and about 1,000 questions.
